4 Lots Amber Haugland, Ambrose, ND	\$29,500.00
3 Lots Janjie Inc, Lake Alma, SK	\$21,000.00

Foreword

Welcome to LaBatte Simmentals 35th Annual Spring Bull & Female Sale on Friday, March 6th, 2015 at Johnstone Auction Mart, 4 miles west of Moose Jaw, SK on #1 Highway. We'd really like to thank again all the bidders and buyers from our past sales for the continued support and the effort you make each year to attend our sale. It is greatly appreciated. WOW! What a past year it has been in the cattle business, steer calves bringing \$1500-\$2000, kill cows \$1500-\$2300, kill bulls \$3000-\$4000 and replacement bred heifers selling for \$2500-\$4000. It's a great time to be in the cattle business! With the cattle numbers down like they are in Canada, US and Mexico the future looks good for many years to follow. You producers should give yourselves a pat on the back, because you deserve this, hanging in there in the tough times, improving your bottom line by using better genetics, good marketing and hard work. We believe Simmental genetics have played a part in this too, with their high maternal traits, superior performance, muscle and carcass value. From the commercial producer to the feedlots and to the slaughter plants, Simmental genetics are in high demand.

Last year we introduced Meadow-Acres Farms of Lampman, SK as our new guest consignors, also announcing they had purchased half of our herd, 170 bred cows and heifers, from us. With this they have become a major guest consignor this year, selling as many bulls as us and a few more. The large portion of their bull offering will be from the cows they purchased from us and the same exclusive Simmental sires we use. This will give you the same consistent group of bulls as in the past, with a few more numbers to choose from. The Fornwalds are dedicated new breeders, full of enthusiasm and energy, that are hard working and family oriented. We are very excited to have them as our guest consignors.

Our bull sale offering this year, along with Meadow-Acres Farms, will consist of about 90 bulls in total, about 55 thick, meaty, polled red bulls, 30 outstanding black bulls and 5 fullblood bulls. Yes, fullblood bulls again. We dispersed our fullbloods, selling them to Red Willow Ranch, the Tylers, at Cutknife, SK in the fall of 2012. I missed my fullbloods and some of our customers missed them too so we decided to buy a few females, small in numbers but high in quality. The red bulls in the offering will be highlighted by Horizon sons and El Tigre sons. The Horizon sons in last year's sale were highly accepted by both the commercial and purebred breeders. Never before has there been a red Simmental bull that adds muscle like Horizon. The bulls are thick, deep made, have lots of hair and big testicles. His first females are just calving now in January of 2015. They're calving easy, are great mothers and have lots of milk. The El Tigre offering has both Red and Black sons. This is the first calf crop offered in our bull sale. He was the \$61,000 Predator son that ourselves and Circle 7 Ranch purchased as the high seller in MRL's 2013 bull sale. He has exceeded our expectations! His calves are very muscular like him, are loose made, correct, have excellent haircoats, big testicles and are powerful. We're very excited about his future.

If you are unable to attend the sale, give myself or Meadow-Acres Farms or any of the sale staff a call to have the sale offering evaluated for you. We can be reached prior to and sale day at Johnstone Auction Mart 306-693-4715 or on our cell phones: Barry 306-815-7900 or Dustin & Kirsten 306-487-7510 or 7514. If you have any questions earlier give us a call on our cells or our home numbers: Barry 306-969-4820, Dustin & Kirsten 306-487-2557, Blair 306-487-2624. We welcome your visit to our farms anytime to see the bulls and heifers firsthand. The coffee pot is always on. Join us Thursday night at the Heritage Inn, in our hospitality room, for some socializing and laughs.

We look forward to seeing you on Friday, March 6th at Johnstone Auction Mart. Please join us for a complimentary dinner prior to the sale and also after the sale for some socializing, refreshments and snacks. Best of luck in 2015 and hope to see you at the sale.

Barry

P.S. All the grandkids are doing great. Growing like weeds! They're kept busy with hockey, karate, dance, Grain 4-H, school activities and Beef 4-H. Yes, 4-H. Brodyn is taking his first 4-H animal, a heifer, in the Radville 4-H Club this year. Grandpa's pretty excited as maybe there's hope that one of the grandkids will want to take over LaBatte Simmentals someday. The grandkids haven't got an animal in this year's sale but would really like to thank Jeff Weal of Assiniboia for purchasing their heifer in last year's sale.

Health	All bulls will be scrotal measured and palpated. Bulls over 12 months of age at time of testing will be semen tested. Bulls under 12 months of age at time of testing will be semen tested prior to delivery. Weights will be posted sale day. All bulls and heifers were given CattleMaster 4, Somnustar PH and Fortress 7 in June and boosted with same in September. All were treated with Ivomec Pour-on in September and January.		
"Sight Unseen" Purchase Program	If you are unable to attend the sale but are interested in our bulls give Barry or Meadow Acres Farms a call and they will personally go over the bulls and your program with you. They will recommend which bulls they think would meet your satisfaction and refer you to one of their sale staff.		
In-Herd Semen	LaBatte Simmentals & Meadow Acres Farms reserve the right to collect semen on any bull sold through this sale. The semen collection will be at the seller's expense and the buyer's convenience. Any semen collected will be for in herd use only.		
Delivery	At the buyer's option and risk, LaBatte Simmentals and Meadow Acres Farms will take purchaser's bulls home, feed them under their management and deliver them FREE anywhere in the prairie provinces to your nearest central location. We will do our utmost to deliver them right to your yard. Delivery will take place between April and the middle of May. For bull buyers outside the prairie provinces, bulls will be delivered at a reasonable charge. The bulls are the property of the buyer as soon as they are sold. Therefore, buyers must insure their animals for the time they are at LaBatte and Meadow Acres Farms. The heifers will be delivered as soon as possible after the sale.		
Guarantee	All animals will carry the standard breeding guarantee as specified by the Canadian Simmental Association. At no time shall the seller's liability exceed the purchase price of the animal.		
Video	Video of sale bulls will be available. For LaBatte Simmentals contact Barry, and for Meadow-Acres Farms go to www.meadowacresfarms.com to view.		
Homo Polled tests	Several of the bulls are DNA tested for Homo Polled. At time of printing catalog we are waiting for a few more results. They will be available prior to sale day and updated on our website.

MRL El Tigre 52Z

A \$61,000 Investment that's really working!!!

El Tigre in October 2014

MRL El Tigre 52Z stood out at the 2013 MRL Ranch Bull sale as a powerful herdbull prospect. It was obvious he would add thickness, muscle and rear quarter to a program. We partnered with Oberle Bros. to purchase him for \$61,000.

His first calves will be among the sale features in the red and black sale pen bulls. They have the conformation, muscle expression and performance to be herdbulls. **They deserve serious attention.**

The El Tigre son, IPU 71B, is the bull we have chosen to honor with the CSA Registration number 1,000,000.

El Tigre will be found in both the LaBatte and Meadow-Acres offerings.

The first daughter of El Tigre to sell brought \$9,100 topping the WLB Livestock Internet Heifer Sale in October 2014.

The next opportunity to invest in El Tigre daughters will be March 6th.

Homo Polled, Hetero Black. LaBette Simmentals is pleased to announce we have selected IPU 71B to be the individual awarded the prestigious C.S.A. Number 1000000. Thank you to the Canadian Simmental Association for making this milestone number available for purchase at the 2014 Friends of Canadian Simmental Foundation Auction in Manitoba this summer.

This is our 44th year in the Simmental business and we have seen many changes over the years in this breed. I commend the breeders for making many changes in their programs for the betterment of the breed over the years. From not being readily accepted by the commercial industry to becoming one of the leading forces in the livestock world today. It took Fleckviehs, Red and Black cattle, moderation, maternal traits, performance and carcass values to encourage the commercial people, feedlot industry and packing plants to want to rapidly expand the use of Simmental genetics in their cattle programs. The commercial cattle industry is the backbone of all us purebred breeders and I think we have done a good job listening.

As for our one millionth registration bull we think he is one of the best bulls we've ever raised, fathered by a great bull and mothered by an Elite female. He's tremendously long and thick, very loose made, deep sided, has a big foot under him, a beautiful haircoat and a good disposition. He DNA tested homo polled and hetero black. We plan on using semen of this powerful young herd bull in our program because we think he has the potential to be a leading herd bull in this great breed as it works towards it's two millionth registration.

There will be a draw from the registered bidders for CFL All Star Brendon LaBatte's autographed Saskatchewan Roughriders jersey.

IPU EL TIGRE 28B

28B is an outstanding ¾ blood bull that we think the world of. He's been a great calf since he was little in the spring. His mother is sired by the Angus bull S A V Net Worth and his granddam is a super black Bodybuilder cow going back to a 600U daughter out of our old matron 304Y cow. He's thick and deep and has huge testicles, really nice thick straight hair, big old butt and a real herdbull presence about him. What would he be worth if he was a purebred Black Angus bull? We think this bull is awesome. Just think of the set of steer calves and replacement heifers he would sire. 260X has a super looking full brother on her again this year.

IPU 6S EL TIGRE 90B

Homo Polled, Hetero Black. Black Jewel 6S has another sale feature again in our bull sale. He's a maternal brother to IPU Red Zone 16A, last year's high selling bull that sold to X-T Simmentals at Eastend, SK for \$59,000. El Tigre 90B is very similar in type, thick, stout, stylish and powerful-powerful. He was our third high indexing weaning weight bull with a 205 day adj weaning weight of 914 lbs. Black Jewel is headed into our transplant program and this year is nursing an outstanding black Horizon heifer calf. Can't wait to watch her grow up. El Tigre 90B possesses some great EPDs, being in the top 1% of the breed for weaning weight and yearling weight and in the top 20% for milk. This homo polled, hetero black El Tigre son has herdbull written all over him.

Homo Black, Hetero Polled. A tremendous full brother to IPU One In A Million 71B. He, like his brother, is long, thick, has great hair, big testicles and has a real presence about him. We also have a full sister to 83B and 71B in the replacement pen and she is a good one too. This flush has really worked on Temptress Clair 12R and we flushed her again this year the same way and are awaiting some more full sibs in February. 83B had an actual weaning weight of 1030 lbs and an adjusted weight of 873 lbs for 205 day, second only to his full brother by two pounds. All summer we would change our minds on which of these two were our favorites, they were always standouts. If you are looking for a black bull that will add length, thickness, hair and style, El Tigre 83B could be your choice.

Another solid black El Tigre bull out of a cow we purchased out of the Shologan dispersal that was our pick of the cows at the sale. She has produced very well for us. In last year's bull sale a good Springcreek Lotto son sold to Spring Lake Colony in Swift Current, SK. Meadow-Acres Farms has two of her daughters they picked out of our herd, with one in their flush program in 2014. 68B will sire those good calves with hair, performance and style.

A very attractive El Tigre son who is the fifth bull we've sold in our bull sale out of the Quattro 30P cow. She's been a producer with sons working in the good herds of Mader Ranches, AB, Jeff Weal, SK, Corey Pettersen, SK and Ron Mills, SK. All her bulls have had performance, length and substance. We had the misfortune of losing 30P this past summer so El Tigre 64B had to fend on his own, but did very well weaning at 870 lbs. If you're looking for a bull to add length, substance and pounds to your calf crop this could be your choice and his replacement heifers could be exceptional.

A true Sale Feature here. This dark red El Tigre son has been a standout since day one. He's how the saying goes "full of meat and potatoes". He's a meat machine full of rib, top, testicles and has a big hip and quarter on him. His dam is a super Red Label cow going back to an excellent Red Chief female. She is the dam of one of last year's high selling bulls, IPU 206S Horizon 6A, who sold to MI Simmentals for \$19,000. She also mothered one of our high selling bred heifers selling in Simmsational 2011 to Bonchuk Farms. We flushed her to El Tigre in the spring of 2013 resulting in two outstanding bulls and three full sisters, all at the top of our replacement pen. She herself had a Pit Boss heifer the end of February and this year has an exciting dark red IPU Redskin 105X bull calf on her born in January. 92B is an exciting young El Tigre son that we think has herdbull written all over him.

Homo Polled, Non-diluter. Another standout red El Tigre son out of the Red Lacey 206S cow. These two transplant full brothers, 121B and 92B, are a couple of true feature bulls. 121B is homo polled and a non-diluter. He's just like his brother; thick, deep, dark red, has a great haircoat and is really made nice through the front end. He really reminds me a lot of his maternal brother that sold in last year's sale to MI Simmentals. We think 121B is going to be a powerful herdsire in someone's program.

IPU 172R EL TIGRE 118B

Homo Polled, Non-diluter. This El Tigre son has been one of our favorites all summer and winter. He's deep bodied, thick made, big butted, dark red, has big testicles and is out of a high producing Red Knight cow that's done a great job for us. In last year's sale her Horizon son sold to RBD Ranch at Milestone, SK, the McKims, who are one of the best commercial outfits in the country. They buy top bulls and sell some of the best bred heifers you'll find anywhere. The 172R cow also raised a herdsire for Rendezvous Farms in Manitoba, a black 608S son who did a real nice job for them. This homo polled, non-diluter, El Tigre son is a high performance, thick herdbull, as his EPDs would indicate. We think he has all the tools to be a very complete herdsire.

This dark cherry red El Tigre calf is a twin which explains the very low birth weight but he is built like a calving ease bull. So smooth made, nice neck extension, moderate framed and very correct. His mother is none other than a Liner 56U daughter out of the great Red Pocahontas 52N cow. You could not write a better pedigree. We think he'll sire some very desirable calves and especially replacement heifers.

El Tigre as a yearling **\$8,750.00**

A commercial 1/2 blood bred heifer of Diamond K Cattle Co. Maple Creek, SK who sold in the Rock Solid Bred Heifer Sale in December, 2014 for \$4300. She was sired by an Accelerator son purchased at our 2010 sale. Diamond K has purchased several bulls over the past few years from us. Bryce and Lance Weiss, owners of Diamond K Cattle Co. run a large ranch south of Maple Creek, SK and are one of the top commercial operations in the country. They hold an annual Bred Heifer sale every year in Swift Current, SK along with two or three other ranches. It has become one of the top commercial bred heifer sales in western Canada to buy top quality cattle from top quality people. In this year's sale Diamond K Cattle Co. sold 107 half blood red bred heifers, many sired by LaBatts bulls and averaged an astounding \$4115. If you have never been to this sale, you should try to attend this coming year, as the quality is deep from start to finish.

Bryce Weiss

MAF R HORIZON 7Y

What an investment Horizon has been for all of us involved in him. His sons and daughters continue to top many sales and rightfully so. We've never used a bull that puts as much muscle, meat and depth into cattle as he does. And now his first daughters are calving and, so far at our place, we've only helped one calf and that's because the calf was backwards. The rest have all calved unassisted. They're milking really well and have great mothering ability and great dispositions. Ourselves and Meadow-Acres Farms have some outstanding Horizon sons on offer again in this year's sale. They're the kind of cattle that can really change your calf crop, putting pounds on your calves, make them easy fleshing, moderate framed and very saleable. We are proud to say that he's one of the best Red Simmental bulls that's ever walked the land and our pasture.

A real nice, blaze face Horizon son out of a really good, old Red Chief cow. This is the seventh bull calf she has raised coming to our bull sale. She has raised sons that have worked in herds in Saskatchewan, Alberta and B.C. That speaks volumes about 43M, a beautiful, blaze face, old Red Chief female who still has an excellent udder. 9B is long, deep and loose made with a really nice blaze down the middle of his head with no other white. He would sire some of those blaze face steers and heifers that are in so much demand.

Homo Polled. This end of February, homo polled Horizon son is a definite sale feature. He's a full brother to our two lead off bulls in last year's catalog, Lots 1 and 2, that sold to Foley Simmentals and Soderghen Ranches for \$16,000 and \$17,000 respectively. He is mothered by one of the best, IPU Pocahontas 68M, a full sister to the famous IPU Pocahontas 52N. 68M has raised many high sellers for us including the \$27,000 Red Teddy daughter that is the mother of IPU Diablo 14Y, owned by Erixon Simmentals. Just recently at the 2014 Simmsational a Crosby daughter of hers sold for \$14,250 to Bonchuk Farms. We have several daughters in the herd now and they are making great cows. 68M is a super uddered cow and at age 13 still scores a 5 out of 5. She's going to be flushed extensively in 2015. Horizon 137B is dark red, has great hair, is soggy, deep, thick and has a great presence about him. We think he is something special and a must see in your hunt for a new, red herdbull.

Homo Polled, Non-diluter. This homo polled, non-diluter Bootlegger son is mothered by our #1 pick of the cow herd, IPU 52N Ms Pocahontas 2Y. When we split the cows with Meadow-Acres Farms in the fall of 2013 we had first pick and 2Y was an easy choice. She's a beautiful, red, Liner 56U daughter, moderate, super uddered with lots of capacity and is out of the famous Pocahontas 52N cow. She's the front pasture kind. We flushed her in the spring of 2014 and now anxiously await her El Tigre calf this spring. In last year's sale her first calf, a black Shear Force son, sold for \$10,000 to Clifford Land & Cattle and Maxwell Simmentals of Alberta. Bootlegger 80B himself is very smooth made, blood red, has a real presence about him and just an outstanding set of EPDs from calving to milk. With his 84 lb birth weight, his color, smoothness and pedigree second to none, we think this young star has a bright future ahead of him.

Homo Polled. Another dark cherry red, homo polled son of Bootlegger going back to the great Pocahontas 68M cow family. His mother is an excellent, young Accelerator cow out of 68M herself. These Bootlegger calves come easy, are usually dark colored, very smooth made, have lots of muscle and are structurally very good. We've been quite impressed by them. This young 100B should sire some great heifers and his male progeny will be high performing whether purebred or steers in the feedlot.

A solid red, smooth made Ribstone son out of a very good, red, Liner 56U daughter. Ribstone was our high seller in our 2013 Spring Bull Sale. We used him on a few cows that spring. 126B's mother is a really nice, moderate, deep red cow with an excellent udder. You know how highly we've talked about our Red Chief cows in the past and we believe the Liner 56U females are going to follow his footsteps with their great udders and the ability to produce the good ones. Ribstone 126B should sire those soggy type steer calves that are so in demand at the auction marts today.

Homo Polled (by parentage). 143B is another Springcreek Liner 56U son that's moderate, thick made, dark red in color and has a tremendous haircoat. He is homo polled by parentage. We have three full sisters in our open replacement pen, two red and one black, and they are outstanding. You can already tell they're going to be really broody, productive young cows like their great Gunner mother, Ms Shamrock 18U. Being out of her and Liner 56U they'll have absolutely beautiful udders to boot. This young herdsire prospect, born the last day of February, will sire some awesome replacement females. If you have cows that need to have their udders cleaned up and put some moderation and fleshing ability in them, this would be a good choice.

IPU 56U RED LINER 128B

Non-diluter. A red Springcreek Liner 56U son that is kind of special. He would be an outcross to most red programs. Being out of two black parents he is a non-diluter and we will soon have results on homo polled as we had to send a new sample on him. We sold a very good, homo polled, black, stylish, full brother to 128B in our 2012 Bull Sale to Rodney Williams and Carey Scrimbit of Crane Valley, SK. Red Liner 128B is thick made, great haired, long and full of capacity. With an excellent uddered Gold Mine daughter as his mother and the beautiful udders on the Liner 56U's he should sire excellent replacement females with superb udders.

Homo Black, Hetero Polled. A rare Black Joker sired bull in 70B and out of an outstanding, black, blaze face Houston cow going back to the black Split Half Diamond cow family. This is the sixth bull that will be going through our Bull Sale that 61R is the dam of and as I write these footnotes she has just had her seventh bull. She's also the mother of our second pick of the cows in 2013, IPU Ms. Exciter 120W, a beautiful, black, blaze face Exciter female that also has really produced for us. 61R's past bulls have sold to Brian & Daryl Kesslering, SK, SAJ Simmentals, SK, Scott Acton, SK, the \$28,500 high seller in our 2012 Bull Sale, Red Chakota 18Y, selling to Tessier Simmentals and Diamond M Ranch, SK and in last year's sale Brian Uran, North Dakota purchased her Lotto son. 70B will be a female producer like his sire, Black Joker, is known for. 70B is very smooth made, has an 86 lb birth weight and is in the top 3% of the breed for his milk EPD. He's homo black and hetero polled and don't be surprised if you get a few baldies off him.

A great, black, blaze face son of Poker Face and mothered by an outstanding, solid black Bolt 13P mother. His dam, Black Satin 680S, is one of our top black cows. She has tons of capacity, is very broody and has an excellent udder. A full sister to 21B sold in the 2013 Simmsational Sale to Frehlick Farms and R Plus Simmentals. Marlin tells me she has a really good bull calf that will be in his sale this spring. We have a Lotto daughter of Black Satin that just calved in January and she too has a picture perfect udder. This blaze face bull is tremendously long, has good thickness and is big topped. He would sire quite a group of replacement females or high performing bull and steer calves. Some of them could inherit his blaze face.

Welcome to the 35th Annual LaBette Bull Sale!

This year brings some significant changes to the bull sale, but rest assured that although it is different, the basis on which this bull sale has been remains the same. We are very excited to be here in a larger capacity than last year and going forward. When Barry gave us the opportunity to purchase the cows and join the bull sale, we jumped at it. It was a huge commitment and opportunity, and we are very happy with our decision! We want to assure all of the customers that have supported the sale for the last 35 years that we are extremely committed to bringing Bulls to town that are the quality that you expect to find here. We will work hard to gain your trust and provide you with the bulls you need to make your operation thrive in the years to come. It is not something that should be easy, but we believe that when you study the bulls we have on offer, they should do a lot of the talking in that respect. We are extremely proud of the bulls we have on offer. They are thick made, deep, soft and structurally sound individuals that for the most part come from the pedigrees and cow families that you have gotten to know over the years. Bulls that will go out and work well in any herd and have a strong impact. We believe that we have a bull that will suit everyone's needs, all which are very functional breeding bulls to help you make the most of your production. I am sure that in every introduction you read this spring they will highlight the strength of the cattle market over the last year and rightfully so. These markets are something that are long overdue and should sustain over the next few years, hopefully longer! A tip of the hat should be offered to each and every one of you that have endured low prices and lean years. It is true that the people that are left have weathered some very tough times and to say you deserve this upswing would be an understatement! Now more than ever it is critical to make breeding decisions based on making you more money and we believe that the Simmental breed is the one to make this happen. It is a breed that has worked very hard to improve upon its early days and remove stigma and now can prove that this is a breed of longevity and pound producing that is balanced with calving ease and great maternal qualities. All of these things can impact a program of any kind, and it is important to make these considerations when choosing your herd bulls. I read a tweet the other day from the Saskatchewan Stock Growers Association regarding calculation of how much can you afford to pay for a herd bull. If you haven't seen it, it is worth finding. It discusses calculations around the consideration of spending more in order to gain more. These types of things become more of a consideration no doubt in a strong market, but will have an even bigger impact in a softer market. Pounds make money, regardless of how you determine what you spend. It should be considered an investment in your cowherd and your bottom line. These bulls have the type and pedigree to do that for you. Our bulls have been developed slowly on a TMR ration based on corn silage and hay. We work closely with a nutritionist to ensure that these bulls are not pushed, but growing well and will stand up and get out and breed cows and last. We are very diligent in our herd health, bulls included. They are, and will be, up to date on all vaccinations and Ivomec.

We look forward to you analyzing our bulls on offer and are pleased to have videos available of all of our sale bulls on our website www.meadowacresfarms.com. If you have questions, please feel free to call, or stop in to tour the bull pen at home prior to the sale or in Moose Jaw. If you cannot make it to the sale, we would be happy to spend the time with you to understand just the right bull for you with our sight unseen program or contact any of the sales consultants listed to assist you. We invite you to Moose Jaw to be a part of this exciting offering on March 6th and look forward to seeing you there!

Heterozygous Polled. Homozygous Black. Our lead off bull is one that has a lot of potential. He is very clean made, straight in his lines and out of great cow families on both sides of his pedigree. He is an embryo calf with a full sister that just calved out here in January and wow, is she ever impressive, awesome uddered and beautiful in her phenotype. 10B's dam, one of our original six Simmental cows, is a moderate framed female, with lots of depth. She has a good udder, with lots of milk. A maternal brother sold to Stan McCrae, Mankota, SK in last year's sale and we have retained another in herd for our own use.

MAF MR. 167B

Homozygous Polled. Heterozygous Black. A special bull in our opinion. 167B may be our most complete bull on offer. He is flawless in his phenotype, possesses lots of thickness and depth of body in a smooth, very correct package. When you analyze this bull, you will be impressed and see how it is hard to find fault in him. His dam, 186W, makes this bull even more exciting. A donor dam in our program and a favorite, she is just a beautiful cow, moderate with a very nice udder. She is a cow that doesn't miss; her last calf was the black Horizon heifer calf that sold to Anchor D Simmentals for \$9,500 last year. This calf has an exciting future ahead of him for sure.

Color test pending. Our only Spring Creek Liner 56U son on offer and our youngest bull, being born the end of March. His age has definitely not slowed him down; he is big topped, wide butted and sound. He is extra hairy, like his dam that is an easy doing, great uddered cow with Powerline and Black Joker in her pedigree. After the success of the Blacksand Dispersal this past December, Liner 56U progeny may be in high demand and for great reason. He is a great opportunity to add very proven genetics to any herd.

MAF MR. 8B

Homozygous Polled. Here is a special bull, a full brother to MAF R Horizon 7Y. As you study this entire offering it is easy to see what Horizon has to bring to any program and the impact he has had at our place, Barry's and the other herds he is being used in. 8B does have more frame but he maintains a very soft made design, he is hairy and deep sided. His dam, LFE Dreamlady 79W, is the foundation female of our herd, with three other bulls in the sale and another son working for Ultra Livestock. She can really produce bulls! She is a big-bodied cow that milks hard and always catches visitor's attention. This bull has a lot to offer any program.

Homozygous Polled. A dark cherry red tank out of Horizon. He is a bull you want to see for sure. Extremely soft made and loose hided with a super hair coat this bull really pulls it all together. When he gets out and moves he is very free wheeling. 27B has been a favorite from a very young age and has always had that herd bull presence about him. We feel this guy is a great opportunity to move any program to the next level with all of the great attributes he possesses. His mother, 76T, is a very attractive Red Label daughter with tons of depth and a great udder, a very easy doing cow. We bred her Horizon her first year here and she had a very nice heifer that is as dark red as this guy. She has calved out now and she is a very nice cow, very similar to her dam. We decided to flush 76T to Horizon after her first calf and this is the result, 27B and his flush brothers 47B and 64B and three full sisters are retained in our herd. Do not let this guy pass you by...great things are in his future.

MAF MR. 76B

Homozygous Polled. This is a bull that is very intriguing and easy to talk about. Powerful would be the word that sums this guy up perfectly. A red son of El Tigre, he possesses extra length of body, combined with extra muscle shape and a nice big foot under him. He is free moving and continues to be more impressive all the time. His dam is IPU 201R, a bull producing cow, with bulls purchased in previous years by Rendezvous Farms, Floer Farms, Dwayne and Brandon Brown and the most famous son, IPU Specialist 70T, who is still working now for Czech Mate Simmentals and Virginia Ranch. Specialist has close to 200 direct progeny registered with the Canadian Simmental Association, if you study this catalogue you will see him in quite a few pedigrees of females that are top-notch producers. 76B should go on to continue the legacy of this cow for years to come.

MAF MR. 158B

Homozygous Polled. Here is a really cool bull, one that will catch your eye and impress you with his width of top and extra muscle shape. 158B has been a bull that has stood out for his thickness, character and how he gets out and moves. Being sired by Lotto and out of a black cow, makes him a bit different as well. His dam is a bull-making cow that is very attractive and thick made just like 158B. Maternal brothers have sold to Brett Buckingham, Yorkton, SK and Cory Peterson, Gladmar, SK.

89

MAF MR. 174B

Homozygous Polled. 174B is a son of IPU Pocahontas 177Y, who we purchased from Barry in 2012 as the high selling heifer. This bull possesses extra length and a very nice profile. He is wide and hairy and backed by a legendary cow family. 177Y is a long and deep-bodied female with tons of milk. A bull that should bring a lot of maternal qualities to his offspring yet not compromise on weaning weights, being in the top 1% of the breed.

The youngest red bull we have on offer, but he earned his place here for sure. 204B possesses extra performance and extra length of body, with a solid set of EPDs. His dam is a deep-bodied black cow, whose bred heifer just calved out the other day and has a very tidy udder and is ideally made.

LaBatte Simmentals will be consigning 20 open replacement heifers in this year's sale including 12 blacks, 7 reds and 1 polled Fullblood. This is probably one of the best groups we've ever consigned to our Spring Bull Sale. Some of the top breed sires

are represented – Horizon, Red Mountain, Cobra, Poker Face and MRL El Tigre. If you have any questions on these heifers before the sale be sure to give us a call and we will be glad to go over them with you or, better yet, come and have a look at the farm before the sale. We would be glad to show you them and their brothers in the bull pen.

Here is a good, black baldy, Poker Face heifer out of a first calf, Blk Tank 1U daughter. Again, good hair, clean-made and moderate. We have used Poker Face on some of our first calf heifers over the past three years with good success. He makes some black baldies for us but more importantly, sires the right type and they are very saleable, both males and females. We've got some Poker Face's calving now and they have really good udders and are making some good young cows.

SALE FEATURE. A tremendous black baldy heifer. She's long, deep, thick, has a great haircoat and is very stylish. Sired by Poker Face and out of a really good, moderate framed, first calf Broker daughter we purchased from Arrow Creek Simmentals as an open heifer at the Shades sale in Brandon. You could hang a halter on 13B if you wanted, we think she's that good. She will raise some herd bulls for you and probably some with that desirable blaze face.

Another dark red, Red Mountain 16Z heifer with lots of depth, length and smoothness. Her sire, Red Mountain, sired by IPU Red Western 49X, was the \$75,000 high seller at the Ashworth sale in the spring of 2013. He was a bull that was shown very successfully, being named Grand Champion Simmental bull at the 2012 Ag-Ex Show in Brandon and he along side his mother were named Supreme Champion over all breeds at that same show.

Another really good Horizon daughter out of a Crocket female going back to the Noremec 16M cow family. Old Grandma was probably the deepest, thickest cow to ever walk our pastures and was the mother to IPU Revolution 172R. He was the bull that showed well and bred well for Beechinor Bros. and High Country Cattle in Alberta. His daughters are awesome! This young Horizon heifer is easy fleshing, deep bodied and has brood cow written all over her.

SALE FEATURE. This is truly an outstanding heifer, maybe as good a one as we've ever sold in our Spring Bull Sale. She's cherry dark red, thick, super deep, has great hair and is very, very powerful. Her maternal brother, IPU Code Red 53Y, is one of our herdsires. This Crosby son is blood red, thick, deep and very well balanced. He is one impressive bull, has great feet and is pure power. We think this beautiful, showy, Horizon heifer is something special and you'll like her a lot come sale day.

This young heifer was purchased in dam at Bonchuk Farms female production sale in December 2013. She was one of Wilf Davis' picks and in his top two. She was a Fullblood heifer bred to a red factor bull and this resulted in this good, red heifer with a star on her head and being half Fleckvieh. She should make a really good, productive, young cow.

A March, high performing, Code Red heifer out of the \$14,000 Yura Queen cow that ourselves and Hay Valley Ranches purchased from Crossroad Simmentals in the 2012 Source Sale. Yura Queen's first heifer sold in last year's sale, an Esposito daughter, to Red Willow Ranches for \$13,000, topping our heifer division. Talking to the Tylers in late January, she had calved, had a beautiful udder and they were very happy with her. Yura Queen 155B is a little later born, she ranked #5 for adjusted weaning weight in our herd, she's dark red and with a mother like 366Y should be very productive.

Another really good heifer that is also a feature. She's three generations baldy as her mother and grandmother were blaze faced too. This heifer is really nice made, thick, deep, broody, has really nice teat placement and has loads of capacity. We think she's the kind that can raise those herdbulls for both the commercial man and the purebred operator.

Well, we're ending our heifer division with a Fullblood. We haven't had any Fullblood heifers in our sale for a couple of years now, so thought since we're getting a few Fullbloods around now we'd better put one in. This heifer is a polled, blaze face, Canyon daughter, out of a really good Wallace first calf heifer we purchased from Virginia Ranch. We just love the mother of this good heifer. She's moderate, has an excellent udder and has another heifer calf on her this year born in January.

\$7,100.00
