**13 LOTS TOTALLING $87,450.00**
Welcome to our seventh annual sale, although the excitement for us makes it feel like its still the first. Before we get into talking about the offering, we would like to take a moment to thank you. Whether it is bidding or buying, offering a helping hand, giving knowledgeable advice or allowing us to farm your land. Without your support we wouldn’t be able to continue doing what we love.

For those of you who are new to our program, we are a family ran purebred Simmental operation. We will be calving out close to 275 purebred females, some which are part of our embryo program. We are fortunate to still be farming along side my parents, Barney and Melody. Over the years they have been our major support system giving us years of knowledge and many hours of help. They run a successful commercial herd that is a very important part of our roots. Again, Dad has opened his entire replacement heifer pen letting us have his top heifers for your appraisal. Along with these commercial heifers we have dug deep into our replacement heifer pen and are offering a strong set of registered heifers. Also, we care for and manage DGR Cattle Company’s herd. Daryl and Roberta Renaud are very good family friends and we appreciate all their support through out the year.

One of our main goals every year is to bring you an animal that is of the highest quality. We spend countless hours looking for our next breeding piece, with the idea that this individual will need to create offspring that will be profitable for the commercial market. We hope that every animal we sell will go on to be profitable and leave a lasting impression in your herd. Also, as noted through out the catalogue, we pay very close attention to the maternal strengths with in their pedigrees as the replacement heifers are a very important part. Your stories of success with our animals are our success stories. The bulls are fed on a TMR diet that consists of corn and cereal silage, chopped hay and a starch free pellet. All the ingredients are tested and balanced to try and allow the animal to achieve a strong ADG without harming their long-term development.

All the bulls are gene tested in one form or another. All the Fullblood bulls have been tested for the dilution gene. A non-dilutor will not throw a grey calf if crossed with a black cow. The red and black bulls have been tested for the homozygous polled gene. A Homozygous polled bull will poll 100% of his calves. Also, this year we tested the black bulls for coat color. A Homozygous black bull's calves will always have a black hair coat.

We know that sale day is busy and that there can be schedule conflicts. If this is your situation, we invite you to come out to the farm and view the bull and heifer pens at your convenience or join us the day prior to the sale for our open house. If you are unable to be present on sale day and are wanting to participate, we encourage you to phone us or take advantage of the trusted and professional staff at Transcon Livestock.

VOLUME DISCOUNT
We would like to offer to our past, present and future customers, as a gesture of appreciation to anyone who purchases 3 or more BULLS, a discount of 5% off of their TOTAL INVOICE. Thank you for your support!

WELCOME FROM TRANSCON

On behalf of the Beechinors and their Guest Consignors welcome to the 7th annual Bull and Female Sale. This fall we saw once again how the heavyweight cattle brought a substantial premium, it’s time to cash in on these heavy weight calves! Come get a bull that will push those scales down, he will pay for himself in a big hurry. All the bulls have been tested for Non Diluter and polled genetics.

You’ll see a few different sire groups in this year’s catalogue. The largest sire groups being from Titanium and Magnum. Consistency! That’s what I think about when I think of Magnum. His calves exhibit explosive growth, in short they have become meat machines. I know that he has surpassed the high expectations that the Beechinors have placed on him. In the past four years Magnum has produced over $204,000 from high expectations that the Beechinors have placed on him. In

DELIVERY
All bulls and heifers that are remaining to be housed after the sale must be insured. Bulls will be housed free of charge until April 15, 2018. Animals will be delivered free of charge to points across Alberta, Saskatchewan and Manitoba. This will be done at the buyer’s convenience, however, if the truck is in your area you may be asked to take your bull early. We will do our utmost to deliver your bull to your yard.

SIGHT UNSEEN
If you are unable to attend the sale, but are interested in bulls or heifers, please feel free to give the consignors a call prior to sale day and they will personally go over the bulls and your program to recommend the animal that would meet your needs. Following that, the Transcon Livestock Team will represent your needs in a professional and confidential manner.

SALE TERMS
Animals sell under the Transcon Livestock Corp. Sale Terms & Conditions which will be posted on sale day.

HEALTH & FERTILITY
All bulls will be scrotal measured. All bulls over 12 months of age will be semen tested. All bulls were treated with Ivermectin and such products and have received all their vaccinations. Contact seller for details on programs. All sale bulls have been given Fusogard vaccine for foot rot prior to the sale.

EPD EXPLANATION
EPD’s are “Expected Progeny Differences”. They are a useful tool in selection. EPD’s incorporate the individual animal with its ancestry performance. EPD’s do not compare across cattle breeds. They are individual-based per breed. EPD’s indicate a probably variance above or below breed average for that trait for a given bull’s progeny. The accuracy of EPD’s for calendar year birthweight and now can be confidently used in the heifer pen. Other bulls used include but are not limited to: Missile, BlueChip, Loaded up, Kill Switch, Klyber, Jug and Dirty Harry. The Beechinors put a strong emphasis in developing great heifers; they have become top cow families in my herd! Joining the sale once again will be the smiling faces of Daryl and Roberta Renaud of DGR.

See you February 25th at the Beechinor Farm just south of Bentley. If you can’t attend please call our cells and take advantage of our trusted and proven order buying service.

Cody Haney
If you are looking for a bull to create dark red, long spined calves, then make sure you look at Titan. He is a dark cherry red bull that has caught the eye of many visitors. Titan is very similar to his full brother in that he is very smooth in his front end with soft sides and a wide hind end. Tinker, Titan’s dam, is an impressive dark red Radium daughter with a fancy, feminine build and square udder, out of a great cow family. Daughters of Tinker’s are working at Rosefield Simmentals and Kent and Tracy Giesbrecht. A son also walks the pastures of Beechinor Land and Livestock.

If you are looking for a bull that possesses a small head that leads into a smooth front end, Ms Suzie is a cow that has left a huge imprint on our herd and after flushing her over the past year will continue to have an impact for many years to come. To date she has produced sale topping progeny with a daughter selling for $27000 ad a son for $22000, not to mention that her daughter Unbelievable 1U is one of our top Fleckvieh donors. Unfortunately, we lost his brother at ten days of age. Past siblings have and are still working in herds such as Virginia Ranch, Vernon’s and the Vegreville Colony.

Component is the end of an Era. Sweet Pea 78S unfortunately came in open this fall at the age of 13 years. This dark red cow will be remembered for her perfect feet and udder along with a very friendly demeanor. Her final son takes many of these attributes with him and adds some extra hair. He also travels extremely well and will add that extra capacity into his offspring.

Titanium Sire of lots 1 - 14
Much like his sire, who we spotted at a couple months of age, Heavy Metal has been special for a very long time. He stood out as a calf with that attention demanding presence, that commanded everyone’s attention throughout the summer. Then he pounded down the scale at weaning, ranking first. He has continued to develop into a super soft made bull with thickness across his top and a big hip. Like most Titaniums, he is fluid in his movement and is smooth made and a docile temperament. Heavy Metal’s dam has been a no miss cow that is as consistent of a cow as we have. Her progeny always rise to the top with many progeny excelling in their respective herds.

Non-diluter

When we decided to flush Unbelievable 1U to Titanium we didn’t imagine that the results would turn out the way they have. Every bull calf born to date has made it to the sale. Steel is a moderate framed bull that has a big square hip. We feel that Steel will continue to develop into a very impressive individual. We feel very fortunate to have acquired the Hendrika cow family in the Eagle Ridge purchase. Over the last two years this cow family has collectively brought 12 bulls to the sale, an impressive feat.

Non-diluter

Ferro is a super eye appealing bull. His cherry red color and fully pigmented face has made him a favorite of mine since day one. He is extremely fluid in his movements and is smooth in his lines. I believe he is the perfect mix of calving ease and performance. His dam is a young cow that looks to have a bright future with a correct udder and ample milk. We lost her first calf just before calving and he was a standout. Ferro didn’t disappoint as he weighed an impressive 857 lbs. at weaning. Non-dilutor
Metallic is not hard to find in the bull pen. Since the beginning he was a calf that you knew was going to be something special. Typically, we would steer a calf born with his color pattern. However, when you look past the different color you see a bull with a lot of desirable traits. Length of spine, depth of rib, deep heart and wide topped would be a few of these traits. The old 143Y mama, a diamond faced cow, has a knack for bringing a good calf home year after year.

Here is a bull that one would call a curve bender. Iron Ore was born to a large framed, deep bodied, good uddered cow at a respectable 80lbs. Turn the clock forward to weaning time in August and he grew into a large framed, long spined, deep ribbed calf with an 800lb weaning weight. It’s not often that you can find a bull that can increase frame and still maintain the calving ease aspect. It’s easy to see that Iron Ore is going to calve well. As an added note Iron Ore’s dam has registered every calf to date with a son breeding at Granum Colony and three daughters working at Kulyk Simmentals, Blazing J and one here at home.

Non-diluter

This cherry red bull is an eye catcher. A smooth made stylish bull that is loaded with pigment, long thick hair and excellent muscle expression throughout. The Titanium/Magnum cross has really clicked well and complimented the strengths of two great breeding bulls. The intrigue of this bull rises when you dig into the pedigree and find the outcross Moses bull and Eagle-Ridge Unbelievable 1U. The dam of Blue Steel, Livia 528C, is an exciting young cow with a tremendous udder and a huge future ahead of her. The first Titanium daughters are calving this year with excellent udders and going to make tremendous cows. Non-diluter
Altar is another deep bodied Titanium son. As we have said before the Titanium offspring continue to impress us with their consistency. Whether it is in the bull pen or the replacement heifer pen the Titanium calves are dark red with good hair coats and are born with moderate birth weights. Altar can be noted for his ease of movement and smooth front end.

Non-dilutor

Forge has been one of those bulls that makes you excited to go do a pen check. Ever since he was born, he's had the look. His sharp appearance can be accredited to his length of spine that carries down into his deep heart, flank and ribs. With everything going right Forge came in at weaning as a heavy weight at an impressive 955lbs. This isn't a big surprise as Forge's dam, Ruby, is known for bringing a top end calf to the replacement pens every year. Non-dilutor

Co-owned with DGR Cattle Company

A guy starts to feel like a broken record as I write the comments for these Titanium sons. Detector fits the stamp that Titanium leaves on his offspring by being long spined, dark red, and clean fronted. Along with these you will see his thick hair coat and smooth skull. Detector's dam is a second calver that has a beautiful udder and one who we have high hopes for. She is backed by our Valor bull who was the high selling bull in his respective year. Look to detector to seek out the pounds you want to add at weaning time without adding frustrations at calving time. Non-dilutor
One of the younger bulls on offer but a calf that is full of potential. A flush mate to lots 4 and 5, you can see the strength in these genetics. A bit more birthweight than a typical Titanium, however his 2200 lb recip adds some extra pounds onto all of her calves at birth. Don’t expect him to do this. Born nearly a month later than most of the bulls, this soggy rascal still weighed over 800 lbs in the middle of August. A flushmate brother was a highlight and one of the heavyweights in last years sale going to Gary Katona at Caroline. Another cherry red heavily pigmented flush mate sister is ranked high in this years first calvers.

A cherry red, heavy haired Titanium bull that has the look with his eye appealing pigment and square build. His dam came from us from R-Five as a heifer calf. Much like her son, she has an excellent, dark red hair coat with a similar colour pattern. Her udder and feet are squarely built. Iron Ore has a nice set of numbers with strong calving ease epds. This is the type of bull that could leave a beautiful set of dark red calves or be a perfect cross on some black females. Non-diluter

BEE Eastwood 3F

I have admired this calf since the time he was born. Eastwood is very proportionate in his make up with a wide flat top line and depth throughout his mid-section. Although lighter in color he is fully pigmented and is developing an excellent set of testicles. We are already seeing the of impact that Zeida is having as she now has progeny working in four different herds with Eastwood being the fifth. This shouldn’t be a surprise as both the top and bottom for her pedigree are maternal greats. Now add Dirty Harry to the mix to make it even stronger. Non-diluter
A heavy haired, long spined, square hipped bull out of Dirty Harry. Clint has the optimal blend of calving ease and performance. Pol Fiona 17Z is a big framed Western Union 2nd daughter that has an excellent udder and production record. To date she has a son and a daughter working back in Quebec and two other daughters working at Anchor D Simmentals and Clearwater Simmentals here in Alberta. You can look forward to this guy leaving an outstanding set of daughters as well as those heavy steers in the fall.

Here is a bigger framed, blood red Magnum son that is backed by no other than the great She Devil 12S. Unfortunately, we lost She Devil a couple years ago. Luckily, we had a small embryo inventory but as time goes on that inventory is disappearing. She Devils influence continues to be felt across the breed as high-end females are working for Stout Brothers, Beechinor Land and Livestock, Clearwater Simmentals and of course here at home. Glock leaves very little guess work here as his pedigree is highly proven on both sides. Opportunities to get ahold of these genetics directly are going to be harder to come by.

This big nutted, fully pigmented, dark red son of Magnum has a lot to offer. Besides being very well mannered from the very beginning, he has grown into a bull that shows potential. Wesson’s dam is a second calver that we look forward to watching develop as she is backed by the great Viper who has already left a lasting impression on our herd. Non-dilutor
Revolver is a long spined, smooth made bull that was born with a moderate birth weight. Today he walks around the bull pen with a fluid stride and a little different pedigree than his brothers. His mother, Aria 401B, is a young cow who has some greats in her pedigree; Hivy, Legend, and Bronson, to name a few, and has already created a daughter that is producing for our herd.

Magnum is a double goggled, heavy muscled, big footed bull that reminds a person a lot of his sire Magnum. His full sister was one of our top first calvers last year who left us with an outstanding female in the replacement heifer pen. His mother is a heavy milking Impact cow that we can expect a good calf from year after year. At seven years of age Magnum continues to move like a cat with his explosive muscling. A full brother sold last year to Randy Valstar.

This beef bull is one you’ll want to put a few check marks beside if you’re looking for one to add some jam to your herd. Nice dark red hair coat with that rugged herd bull look, lots of capacity and length of body. His dam is a flush cow we bought privately out of the keeper pen from Bar 5 in Ontario with our great friends the Stout Bros. We believe highly in this tidy uddered, easy fleshing cow so we flushed her at a young age and this is her natural calf. He weaned off big and continues to look the part. He should sire a great set of both male and female calves. The Magnum daughters are showing that they have ability to pass on his traits. Non-diluter

Another meat machine in the fullblood department. Zenith is a hairy, solid colored, almost blaze faced bull that is completely red to ground on all four feet. Miati, Zenith’s dam, is a highly productive, super uddered cow that we acquired when we bought a small package of cows from Ron and Roxie Vert. We are currently calving the first Climax daughter and early indications are that they will have great udders and a good supply of milk.

If you’re looking for a bull to add maternal strengths to your cow herd be sure to look at Finale. As his name states this is the finale for the notable Eagle Ridge Ruby 41R. Unfortunately, Ruby came in open this fall at the age of 14 years. She left us with four daughters over the years and has sons that are working for Bar Heart Ranching as well as our good friends the Coupland’s. Finale, himself, is dark cherry red with double wrap around goggles.

Kalibre is a big time herd bull prospect with an immense amount of potential. A polled bull with an intriguing pedigree; an interesting mix of power and calving ease genetics from around the world. His big bodied, tidy uddered dam that is one you’d want an entire herd full of. The maternal side of this pedigree is one of the best in the business. We teamed up with JNR to purchase Zaltana as the high seller out of Parview’s Reduction Sale and Kalibre was just a few hours old at the time. He quickly developed into a rugged powerhouse bull and never looked back. Massive hipped and wide topped, he’s a bull that can rival most horned bulls in terms of overall mass. Great testicle development and that herd bull presence. The future of polled cattle looks bright and I truly believe Kalibre will have a part to play forward. Parview wishes to retain 50 straws of in herd use semen. Beechinor Land & Livestock and JNR Farms would be interested in discussing a semen package purchase if the buyer so chooses. Non-diluter - Owned with JNR Farms.

- EAGLE-RIDGE 83N

If you’re looking for a bull to add maternal strengths to your cow herd be sure to look at Finale. As his name states this is the finale for the notable Eagle Ridge Ruby 41R. Unfortunately, Ruby came in open this fall at the age of 14 years. She left us with four daughters over the years and has sons that are working for Bar Heart Ranching as well as our good friends the Coupland’s. Finale, himself, is dark cherry red with double wrap around goggles.

Non-diluter
Barrage is a dark cherry red grand son out of the Double Bar D’s famous Juggernaut. It should be noted that Barrage was born with a very modest 80lb birth weight and was able to take advantage of his heavy milking Klyber dam to put on some exceptional growth margins. When analyzing Barrage, you should make note that he is more moderate in his frame and will see that his muscling extends deep down onto his lower thigh. Take a close look at this guy if you are wanting to add that dark red color to your herd.

BEE Apex 1830F

One of the bigger framed bulls in the pen that is sure to add performance to his calves but still maintaining a degree of smoothness through his skull and shoulder to allow for calving ease. More birthweight than some might like but look at the design of this bull, Becca was on calving duty for this one and said he was out in two contractions. His dam is the definition of a broody cow with a belly that almost drags on the ground and outstanding muscling. He is a younger February born bull that didn’t give up much to his older pen mates weaning off over 800 lbs in the middle of August.

BLL Summit 1816F

A neat bull here with lots going right for him. He is one of the largest hipped bulls in the offering with great thickness over his top. Climax sons were popular last year and by looking at this guy its no wonder. They all carry that massive hip and a touch more frame than some of the other sire groups. Dark red, hairy and heavily pigmented. His dam was a past high seller from Triple T Diamond in Manitoba. She has an excellent set of feet on her with a nice udder and perfect teats. She got sick in late spring and we were fortunate to keep her alive. She weaned this bull off a little early but he has done a great job of catching up to his pen mates since.

This bull has been a meat machine since day one. He is a bull that has an excellent top line that extends down deep into his heart and flank. Also note that Blitz has an outstanding set of feet. Blitz’s mother is a deep bodied, good milking Jahari daughter that made the trip west late last fall. As time goes on, we are finding that the Jahari females continually raise good calves that are noted for their ease of muscling and doability. Non-dilutor

Non-dilutor

BLL 1814F Not very often do you find an Impact son for sale anymore. He was a bull that built a base of cows that would be tough to rival. We were extremely fortunate that Eagle-Ridge offered us their mature cow herd 10 short years ago and with it Anchor “T” Impact who instantly became a major player in our program. Brunt is a bull with stature, length and nice body. His most defining feature might be the momma cow that raised him. One of the real special ones in the herd whose first daughter commanded $31000 to Starwest, who just produced a $32000 bull for them last year. Vanessa has also put sons into Dallas Phillips herd and another breeding my fathers commercial cows.

BEE Tyhee 112F

A smooth made, long spined bull that is out of Wolfe’s heifer bull, Double Bar D Kitimat. We were fortunate to have acquired Tyhee’s mother from the Wolfe’s as a bred heifer in last years equation sale. We were drawn to Dana 2D by her extra length of spine and phenomenal udder structure and teat length. It didn’t hurt that she was a daughter to Wolfe’s last heifer bull, Beech Bros X-man. With a double shot of calving easy one should expect Tyhee to be an easy calving bull. Non-dilutor

A polled, calving ease bull with some added muscling out of the trusted Anchor D Imax. Focal Point came to us out of a perfect uddered, phenomenal first calf heifer that was part of the Quebec cow purchase. This Dirty Harry daughter was to be part of the Eastern Harvest Sale but had to stay home as she ended up with a sore foot. Luckily for us, Sebastian was willing to send her with the cows. With his small bone and perfect shaped head, I would expect this guy to be a very good calving individual. **Non-dilutor**

Max will be the first calving ease son of Domi to be offered for sale. Domi is a bull that we purchased from Skywest Simmentals to serve as our heifer bull. As we calve our second set of calves, he has done everything we had hoped. The calves are born small, get up, suck and grow. Max was born with a nice 72lbs birth weight to a female that we hope will create her own cow family. We were the lucky bidder when JNR offered pick of their heifer pen back in 2016. As a result, we brought home a thick haired, solid color female that had a pedigree for a cornerstone cow. **Non-dilutor**

007 is one of the first sons of our junior herd sire Double Agent. In our never-ending search for new genetics, we were excited to come across a bull out of Oakview’s fabulous Pixie donor cow. This long spined, big footed bull is backed by a deep barreled cow that is a direct daughter to our great MTV Mary 19T. This cow has raised many high selling progeny over the years. If you are looking to add a little more frame to your calves, 007 is your guy! I would expect the offspring from this bull to be an impressive group of steers. **Non-dilutor**

- OAKVIEW DOUBLE AGENT 103D
- DLH MISS PIXIE 6P

**Dam**
- CROSSROAD RADIUM 789U
- BEE RUBY 429B
- BEE RUBY 221Z

Agent is a heavy haired Double Agent son that has an excellent temperament and a large front foot. Agent’s dam is a young second calver that has a beautiful udder and is a sister to lot 11, BEE Forge 221F. Ruby 429F’s first calf is one of the top fullblood bred heifers in this year group and like her mother, is also setting up a perfect udder and teats. Overall, this cow family is one that is continually rising to the top. This would be a bull that I would want to keep the heifers from to create a strong group of cows.

- DOUBLE BAR D WIT 6051S
- TE MARA

**Dam**
- CROSSROAD TUXEDO 222T
- VIRGINIA MS LISA 38Y
- VIRGINIA MS RENEE 49W

This bull packs meat onto every part of his moderate frame. Square made with a wide top, big quarter and round barrel. His dam is a model cow tracing back to an extremely productive cow family at Virginia. Repartee is built right from the ground up with added style. Wit was a bull that we only had for a few months as he was unfortunately struck by lightening out on pasture. Luckily had collected semen already. As a result, is progeny have been limited but his maternal influence plays an integral role in our herd. They are all tidy uddered, good footed cattle and you can expect the same from Repartee’s females.

- MRL MISSLE 138C
- MRL MISS 24232

**Dam**
- WHEATLAND BULL 468P
- BEE WINNE 139Y
- BEECH BROS WINNIE 914W

A bigger framed bull that has all the bells and whistles. Warhead is a Missile son out of another top end producing cow. Winne is a deep barreled, picture-perfect cow that has bred extremely well to Missile. Her first mating sold this past fall in Red and Black as a bred heifer. Warhead is the second and just the other day another bull calf hit the ground. It should be noted that Warhead was one of the heaviest bulls at weaning and has continued to be part of the big bulls in the pen.

This is a bull that is hard not to like. Whether it is his overall quality or extremely quiet nature, he is easy to notice. Maverick has been a real favorite amongst the family since he was born. As a calf he would follow you around until he got a scratch and even now as a bull, does the same. We purchased his mother from the Gagnon’s as a bred heifer. She is a heavy milking female that raised the heaviest heifer calf in 2017 as a first calf heifer and then turned around and produced one of the heaviest weaning bulls as a second calver. A bull that is easy to look at.

Infrared is a very proportionate, soft made bull with a large set of testicles. He is a bull that we have been excited about from day one. His dam, Zion 204Z, was the result of an exciting flush done on our old donor cow, Paradise, and the female maker Power Drive. Last year Zion raised a full sister who is one of the top red bred heifers at Beechinor Land and Livestock. Infrared should be a bull that will raise an outstanding set of replacements.

The past couple years the big Simmental calves have been bringing a premium. In a time when margins are tight, those premiums are a valuable thing. Red Chip is the type of bull that can help you towards that. A long bodied, large framed bull with a splash of white on his face that will help distinguish the Simmental influence as his calves go through the ring.

Both of his parents are blazed faced so doubling on that trait will not hurt. The Blue Chip calves have lots of growth and stretch. They weaned off well and continue to be pen leaders in performance. A 3/4 brother to the Lot 41. Another great thing about this bull is he is homozygous polled so no need to worry about horns on his calves.

Homozygous Polled

One of the first sons to be offered off of the Canadian high selling red bull we purchased with Bohrson in 2017. Wall Street is big boned with a soggy mid section, cherry red thick hair coat and a eye grabbing blaze. He's another bull that will add pounds onto your calf crop when its time to market them. His dam is a dark red big bodied Revolution daughter. If you have followed the red program long, you have seen what Revolution and his daughters have done. The combination of Blue chips sire, the great female maker, 56U and Revolution will leave you with strong uddered, heavy milking females for years to come.

Homozygous Polled

Exclusive has been a meat machine since he was a young calf. It would be difficult to make this guy much deeper in his rib or add meat into his hind end. This outstanding blaze faced bull is backed by a very fertile, heavy milking, strong uddered cow family. Exacy 332A is a dark red cow that has a small udder that is full of rich milk. With both Exacy 332A and Blue chip having strong maternal traits, one should expect to see exclusive daughters become powerful cows that raise big steers.

This dark red, blaze faced, performance bull came in a recipient dam with the cows purchased from Quebec. This guy was interesting to me in that he is the result of crossing BMS' powerful Jahari donor cow, Petra 68X, and Capone. The result is created a deep bodied easy fleshing bull and will be sure to add some chrome to his calves as his dam is a Full Fleck cow. Also, be sure that Franki will add milk to his daughters. Hetero Polled

$8,000.00

The lone Reckless son that will not go unnoticed on sale day. Reckless is a bull that we used to add some growth into our red and black program. Heroic is a dark red, deep bodied bull who has an outstanding hair coat. Unfortunately, we lost Heroic's mother this past fall to hardware. Xstatic 26X will be a cow that will be remembered for being a picture-perfect female. She was a Revolution daughter that walked around on four perfect feet and had an absolutely gorgeous udder. Hetero Polled Co-owned with DGR Cattle Company

$4,000.00

Stringer is a fancy, mid-February born Blue Chip son that should calve without any trouble. Both his sire and dam are blazed faced, smooth made individuals that have calved extremely well. Blue Chip calves are born with small skulls but have extra length to them making them weigh a little more at birth. Although their birth weights can be a little heavier, they are born with very little effort from the cow. Luna 517C is a maternal sister to the great Bee Yara 122Y and already has created a bull that is currently the heifer bull at Robert and Darcie Steffler's. Hetero Polled

$4,700.00

This dark red, blaze faced, performance bull came in a recipient dam with the cows purchased from Quebec. $8,000.00

The lone Reckless son that will not go unnoticed on sale day. Reckless is a bull that we used to add some growth into our red and black program. Heroic is a dark red, deep bodied bull who has an outstanding hair coat. Unfortunately, we lost Heroic's mother this past fall to hardware. Xstatic 26X will be a cow that will be remembered for being a picture-perfect female. She was a Revolution daughter that walked around on four perfect feet and had an absolutely gorgeous udder. Hetero Polled Co-owned with DGR Cattle Company

$4,000.00

Stringer is a fancy, mid-February born Blue Chip son that should calve without any trouble. Both his sire and dam are blazed faced, smooth made individuals that have calved extremely well. Blue Chip calves are born with small skulls but have extra length to them making them weigh a little more at birth. Although their birth weights can be a little heavier, they are born with very little effort from the cow. Luna 517C is a maternal sister to the great Bee Yara 122Y and already has created a bull that is currently the heifer bull at Robert and Darcie Steffler's. Hetero Polled

$4,700.00
Gangster is a loose hided, soft made bull that has tremendous depth of body and length of spine. If maternal strengths are important in your breeding program be sure to find Gangster on sale day. Between Capone on the top side and Ritzie 496B on the bottom you have a power packed pedigree that include females such as Miss 836W, HAAS Ranch G217, Hilda and Mitzie. Look forward to having a beautiful set of heifers and steers that have that nice chrome marking on their face.

Homo Polled
Co-owned with DGR Cattle Company

30F This embryo bull calf is a thick haired, moderate framed individual. Rum Runner has had two full sisters that were born three years ago. One of those two sisters was selected for the Red and Black bred heifer sale and sold as a high selling bred to DGR Cattle Company. The second sister remained at home to work for us. Both sisters had heifer calves and both calves are at the top of the replacement heifer pens. Rum Runner’s dam is none other than our lead red donor cow, Nydam 54X. A maternal brother was the second-high selling bull going to Robert and Darcie Steffler. Nydam has created many high sellers and will without a doubt grace the walls of the Sale Barn.

Homo-Polled
Nydam 54X Dam of 30F

Red Mamba is a high-performance, long spined bull that is sired by the famous NCB Cobra. His sire has created such an impact on the breed that a sale was created this past summer that entirely encompassed his offspring. Red Mamba’s dam is no slouch either as she is the grandmother to Rust Mountain’s highly profitable red donor cow BEE Yara 122Y. Look to Red Mamba to add length and growth to his calves.

Homo Polled
If you're looking for a heifer bull and like that blood-red almost black hair coat color, then be sure to check out Mountaineer. He is a bull that was born at a small 75lbs to a first calf heifer that is the same color as Mountaineer. Luna is a smaller in stature and has an excellent udder. Mountaineer is sired by our extremely trustworthy heifer bull, Cliffhanger, who has proven to be bulletproof on heifers. Mountaineer is a small framed bull that has some extra muscling compared to most calving ease bulls. Homo Polled

**Hetero Polled**

It is very rare that I leave twin bull calves intact but when these two were born I had a feeling that they were too good to let go. Still to this day they are very similar in many aspects. Both bulls have great hair coats that cover a wide top and hip, features not uncommon for Red Whiskey offspring. Moonshine's and Outlaw's dam, Whitney 42W, is a cow that just keeps getting better with age. Being ten years old and having twins I feared there would be a high chance this good cow would come home open. However, she caught to her first breeding and is due to calve again in the middle of January. She has always calved on time and has daughters working at home and a son that is breeding for Peter Berg.

**Hetero Polled**

If you're looking for a heifer bull and like that blood-red almost black hair coat color, then be sure to check out Mountaineer. He is a bull that was born at a small 75lbs to a first calf heifer that is the same color as Mountaineer. Luna is a smaller in stature and has an excellent udder. Mountaineer is sired by our extremely trustworthy heifer bull, Cliffhanger, who has proven to be bulletproof on heifers. Mountaineer is a small framed bull that has some extra muscling compared to most calving ease bulls.

Balaclava is another small skulled, smooth shouldered, square hipped Cliffhanger son that I wouldn’t be afraid to put in my heifer pen. This bull is backed by the tremendous Ms Tracker cow family. Ms Red Tracker 692D is a very complete young cow that did an outstanding job on her first calf. Being the youngest calf in the sale and out of a first calf heifer says a lot about this guy. The Cliffhanger calves are born small and grow up into replacement quality stock on a continuous basis.

**Homo Polled**

Co-owned with DGR Cattle Company

In an effort to try to continually offer new genetics to our customers we acquired a package of embryos from Ultra Livestock. Regulator is a direct result of this purchase and fortunately for you he came as a dark red, easy doing, muscular bull. Ultra Livestock obtained Regulator’s dam as a bred heifer through the Simmsational Sale coming from the great program at Labatte Simmentals. El Tigress 113B was a soft made, deep bodied female that was noted by many at the sale and we felt that the cross to Kill Switch added an interesting genetic twist to this already outstanding female.

**Homo Polled**

Shutdown is a very heavy muscled black bull that is stout from every angle. He is a true beef bull and one that carries different genetics than has been offered before. His dam is a broody donor from the Ultra program that we admired when she was purchased as a high seller from Labatte. Add in the exclusive $206,000 Kill Switch bull and this is an intriguing package. Shutdown is a pen leader in performance and will add muscle expression, rib shape and thick hair coats onto his progeny. Full brother to lot 51.

Monday, February 25, 2019 - Bentley, Alberta
These six bulls mark a first for us. This will be the first time we have offered a large number of siblings in the same sale. When we were looking to add a different twist on our lead black donor cow, Ms Tracker 49X, we were excited about the possibilities Loaded Up could bring. However, we would have never thought that outcome would have been this good. I would challenge you to try to pick out a favorite among these brothers. They are very consistent in that they are big hipped, deep ribbed, smooth fronted bulls that possess that little touch of style. The Combustible siblings are tried and tested. They have had brothers that were high sellers back in our 2017 bull sale and sister that Ultra livestock choose as a high seller as a bred heifer. That heifer has now gone on to raise a heifer calf that was chosen to sell at Agribition and this year has their top heifer calf. Ms Tracker was the lead off and high selling female at the Kopp Farms dispersal sale. When we purchased her, we were looking to add a cow to the herd that would become a cornerstone for our black program. She has certainly done that, as her first daughter, who calved last year, has produced a bull for the sale, BEE Balaclava 692F. Her second daughter has produced a top end heifer, BEE Ms Deputy 847F who is selected for the heifer portion of the sale. Co-owned with DGR Cattle Company

**Monday, February 25, 2019 - Bentley, Alberta**
Here will be one of the first sons to be sold out of the exciting new herd bull, RF/RUST Stimulus. The first females sold this past fall created quite the stir. To date the Stimulus calves have been born early in their gestation and are very vigorous.

**BEE Boost 175F**

- **Sire:** TNGL GRAND FORTUNE Z467
- **Dam:** JS SURE BET 4T

**BEE Equalizer 71F**

- **Sire:** REMINGTON LOCK N LOAD 54U
- **Dam:** TNT KNOCK OUT R206

**BEE Wager 621F**

- **Sire:** HSF HIGH ROLLER 12T
- **Dam:** BEE AURORA 621D

Wager is the only Skors High Roller son that we have available this year. High Roller is a bull that we utilize with confidence in our bred heifer AI program. Over the past couple years all his calves have been born unassisted. I feel that with Wagner’s small birth weight and smooth lines he will more than likely follow in his father’s footsteps. Wager’s dam was a first calf heifer that is a smaller framed cow with a copious amount of hair. I won’t be afraid to bet that Wager will work very well as a calving ease bull. **Homo Polled - Hetero Black**

**BEE Equalizer 71F**

- **Sire:** REMINGTON LOCK N LOAD 54U
- **Dam:** TNT KNOCK OUT R206

Here’s a fancy, eye appealing, chromed up bull that is a natural born calf to our donor cow, Skors Dancer 71Z. Equalizer will be among some of the first Loaded Up bulls to sell in Canada, making him outcross to the majority of the black herd. One must appreciate the muscling ability and structure that Loaded Up had added to his progeny. Equalizer's dam is relatively new to our embryo program and we believe that she will have a lasting impression on our program for years to come. This bull has caught the eye of many visitors over the past year and is sure to impress. **Homo Polled - Homo Black**

**BEE Boost 175F**

- **Sire:** TNGL GRAND FORTUNE Z467
- **Dam:** IPU MS. TULA 175Z

**BEE Wager 621F**

- **Sire:** HSF HIGH ROLLER 12T
- **Dam:** IPU MS. TULA 175Z

**BEE Equalizer 71F**

- **Sire:** REMINGTON LOCK N LOAD 54U
- **Dam:** TNT KNOCK OUT R206

**BEE Boost 175F**

- **Sire:** TNGL GRAND FORTUNE Z467
- **Dam:** IPU MS. TULA 175Z

Here will be one of the first sons to be sold out of the exciting new herd bull, RF/RUST Stimulus. The first females sold this past fall created quite the stir. To date the Stimulus calves have been born early in their gestation and are very vigorous. Boost is a long spined, dense haired bull that has a great producing mother. IPU Ms. Tula was the high selling black heifer calf at the Labatte Bull and Female Sale. Tula has developed into a picture-perfect cow and has a daughter producing at Skyline Simmentals. **Homo Black – Hetero Polled**
Brunson is a big framed, long spined, smooth made percentage bull that comes from one of our top cow families in the commercial herd. The 50 line is known for creating heavy milking, good uddered cows that typically bring the biggest steers in every year. Springcreek Blue Chip was the Canadian high selling red bull in 2017. Blue Chip's maternal lineage is very strong, and we are expecting that the females will make outstanding cows.

**Homo Polled - Hetero Black**

Co-owned with DGR Cattle Company

**BEE Blaze 533F**

Sire: SPRINGCREEK LINER 56U
     SPRINGCREEK BLUE CHIP 9D
     SPRINGCREEK TARA 111R

Dam: FBF1 COMBUSITIBLE
     BEE CALLIE 533C
     BEE ZIANG 247Z

A black blaze faced bull that is a long, smooth, bigger framed bull. Blaze will mark Austin's second bull to enter the ring. As part of an education fund all the children get the chance to pick their favorite bred heifer when they start school. Austin did a great job of picking Callie, a sleek fronted Combustible daughter. Callie has already made her presence known as she raised last years high selling black bull going to the wonderful Aarsby family.

**Homo Polled - Hetero Black**

**BEE Black Arrow 171F**

Sire: COME AS U R RED ROCKET
     MRL MISSILE 138C
     MRL MISS 2423Z

Dam: TNT KNOCK OUT R206
     SKORS DANCER 71Z
     SKORS MS BLACK DANCER 491

**171F** An attractive embryo calf out of our black donor cow, Skors Dancer 71Z. Black Arrow is smooth in his build and has had an attractive appearance to him from a young age. A full brother sold to our good friend and neighbor Andy Mueller and a full sister to Double Bar D in last years sale. The females that are flushmates to Black Arrow are both our top black bred heifer and top black yearling heifer in the respective groups. Look to Black Arrow to add that easy muscling ability to your herd. **Hetero Polled - Hetero Black**
Here is a female I shouldn’t be putting up for sale. The only reason I was willing to add her to the sale group was that I have a very similar maternal sister in the bred heifer pen. Olivia is a loose hided, thick haired, fully pigmented female that should have ample milk. Lots of maternal strengths throughout this heifer’s pedigree.

Beechinor Bros. Simmental Bull & Female Sale
This well muscled, dark red, deep bodied heifer is sired by our eldest walking bull, Magnum. There have been very few opportunities to buy a Magnum female and as he gets closer to his retirement years these chances will only become harder to come by. Diamond is appropriately named as she is backed by the great SU Diamond cow family.

Another dense haired, deep flanked, feminine Titanium daughter. The first Titanium daughters are calving this winter and we are very happy with their udder and teat structure. Goldilocks has a phenomenal temperament and will often search you out for a scratch. This double goggled heifer has a big barreled, perfect uddered dam that has been highly productive.

Drizzle is a dark red, feminine heifer that is a combination of our last three Fleckvieh herd sires. Titanium, Magnum and Viper. Drizzle's mother is a maternal sister to BEE Forge 221F that will be sure to grab some attention at the bull sale. Expect Drizzle to be a good milker as she has a milk EPD of 36.3, which puts her in the top 3% of the breed.

**BEE Damsel 805F**

$4,100.00

**BEE Queen 886F**

$3,700.00

**BEE Ms Deputy 847F**

$4,000.00

---

A super stylish, square hipped, wide backed female with an outcross pedigree. Damsel’s mother, Damara 55D, was purchased at the Western Harvest Sale and was Virginia Ranches high selling red bred heifer. Damara is a blood red female that has tremendous depth of rib and an excellent udder. Strut, Damsel’s sire, is an impressive individual that operates as Virginia’s red heifer bull.

Queen is a beautiful blaze faced female, who extends deep from her heart all the way to her flank. This thick hair coated heifer will be the first Blue Chip female that we will offer for sale. Queen is backed by a tremendous uddered female and should perform well as she ranks above 30% for breed averages in weaning weight, yearling weight, maternal weaning weight, maternal calving ease and milk.

A low birth weight, long spined, fancy female out of the $77,500 IPU Red Deputy. Ms Deputy is the first calf out of the tremendously uddered Ms Red Tracker 678D. Although this is her first calf she is backed by our lead donor cow, KOP Ms Tracker 49X. a nice balance of calving ease and performance in this mid January born heifer.

---

**Co-owned with DGR Cattle Company**
A dark red, hairy, long spined Cobra daughter that will develop into a bigger framed female. Jess’s dam is a deep bodied, fleckvieh influenced cow that has a nice blaze and strong udder. The Cobra females have generated a lot of attention in past sales with many daughters selling to top end herds.

Essence is a long haired, attractive female that is sired by the performance bull MRL Red Whiskey. After seeing Red Whiskey’s first set of daughters, it was obvious that he needed to be apart of our AI program. Essence’s dam is a second calver that is a dark red female with a good udder and very strong feet. I would expect Essence to become a good honest cow.

Here is a heifer that has came right off the top of the black replacement heifers. She spent the summer as a member of the show pasture and probably shouldn’t be leaving. Sired by the new and exciting Stimulus and mothered by a heavy milking Skors Joker daughter that does an outstanding job. Sable has always had the special presence to her with a great temperament. I think she would make a very interesting show prospect. Co-owned with DGR Cattle Company.

A long spined, clean fronted female that is sired by Stimulus. As stated earlier in the bull section, Stimulus created a huge stir this fall in the heifer sales. This shouldn’t be a surprise as he is backed by the breed leading RF Certainly Flirtin 202Z. Faith’s dam is a good uddered, highly fertile cow, calving in the first cycle every year. One should note that Revolution appears in this pedigree.

May is an extremely deep bodied heifer that is a little more moderate in size. Unfortunately, May was weaned about two months earlier than the rest of her sisters as her mother was struck by lightening. With her being at pasture we were unable to get a weight and therefore used her weight when she came in with the rest of the heifers. We are currently calving out the first Missile heifers and are happy to report that they calve with ease.

The commercial herd remains a vital part of the operation and has been developed meticulously by our father over the past 40 years. Again, this year we have offered the heifers right off the top end of his replacement pen. Like the purebred herd, a great deal of emphasis is placed on the strength of cow families. Many of these heifers go back to some of dad’s best cows. All the heifers have been palpated and are guaranteed open and ready to breed.
Special Thanks

Last March we decided it was time to add a couple hands to help get the work done. We were told about a young man from Rimbey. Over the last year we have learned a lot about this young man. Jordie is not only an extremely hard-working individual but is an outstanding person. He is very respectful and comes with a great sense of humor. He has fit in so well that the children refer to him as Uncle Jordie. Jordie we can’t thank you enough for all your help around the farm. You have made a huge difference!
